Subject: ECA comment documents

Hi Greg,

I want to make sure that we have all of your public comments to date on our website. I have two sets from you, a document dated May 17, 2012, and a document dated June 13, 2012. We also have the material that Herrera prepared.

Are we missing anything?

Re: Questions for AMEC

Evan,

As we discussed, I am writing to summarize the areas of the AMEC best available science report and presentation pertaining to the Erosion Hazard Areas near Sensitive Water Bodies in the City of Sammamish that we would like clarification on.

AMEC makes what appear to be three broad statements regarding BAS and policy:

- *"Generally, best available science for protecting sensitive resources requires buffers and offsets, and does not support increasing risk-associated activities proximate to the resources. For these reasons we do not recommend changing the restrictions of SMC 21A.50.225 (3)(b)." (pg 9 of the amec BAS Erosion Hazard Area & Erosion Hazards Near Sensitive Water Bodies paper).*
- *"BAS does not support disturbing erodible soils on slopes over 15%" (slide 36 of the June 14th presentation)*
- *"BAS does not support increasing development areas in EHNSWB" (slide 38 of the June 14th presentation)*

There is no specific reference to the scientific source for these statements. I note there is a list of references at the end of the report, but it would be helpful if AMEC would supply us with which source these conclusions were drawn from.

Thanks for your help in this matter.

Please contact me if you have any questions, 425 347 2898.

Sincerely

Greg Krabbe, PE

Subject: PC testimony 6-14-12

Debbie, please forward this on to the Planning Commission, Planning Staff and AMEC consultants as appropriate. Thanks,

To the Planning Commissioners, City Planning Staff, AMEC consultants and others:

On further reflection regarding my testimony before the Planning Commission last night I am convicted that some of my comments may have been inappropriate in this venue. If anything I said came across as being offensive or demeaning to anyone it was certainly unintentional. I do have some frustrations regarding the ECA update process and I probably allowed my emotions to cloud my better judgment. To anyone who felt offended or hurt by any of my comments I offer my sincere apology.
